**Attachments:** Chemical Manufacturing Section 114 Component I Questions.docx

Hi Darryl,

Brenda wanted me to pass along a draft of the CAA section 114 we are getting ready to send out for the chemical sector to see if you all had any comments on it. I'll note that we started with the Ethylene Production 114 we sent out a few years back that Larry reviewed and had a few comments on as our starting point, so we've incorporated some of the info you all likely want us to request already (but obviously things change and we may be missing something). Anyways, here's a Word version of the draft request if you all have any feedback (we also have an Excel response template with the same info that industry will use to respond to us but find it easier to leave comments in Word files). Timing-wise, we are targeting trying to get this out in early January when everyone is back from the holiday leave and all, so it'd be great if someone could review and provide feedback in the next few weeks. Let me know if you all have any questions.

-Andrew
